## PROFILE

A reliable and dependable tour manager and session guitarist with experience of live performance and management ranging from corporate and private events to intimate venues scaling to large festival and arena productions.

I strive to provide a professional and considerate service that allows my clients to feel at ease and confident, resulting in optimal outcomes.

Proficient in both live performance, artist management and logistics, I provide a well rounded service ranging from session work to tour advancing and budgeting, as well as technical backline support.

I am qualified and work as a Quantity Surveyor, managing civil engineering and highways construction projects. My career skills are transferable to live production and touring by implementing budgets, supply chain management and project management.

## EXPERIENCE OVERVIEW

### James McVey (The Vamps)

2023 - PRESENT

#### Tour Management & Session Guitarist

I have been working with James since late 2023. Throughout 2024 to present, I have continued to provide both session guitar and tour management services for James. Including both UK and Europe headline and support tours, as well as studio and writing sessions. These tours have been financed independently by James, so a key component was to produce a robust and profitable budget, allowing James to maximise quality and value for money. I ensured merch production, sales and delivery across multiple venues were met, as well as organising VIP and meet and greet events. This included liaising with booking agents, venue reps and security to ensure this operated efficiently.

### Henry Moodie

2024 - PRESENT

#### Tour Management support

I have provided on the ground management support for Henry at large UK and Europe festivals, ensuring on the day logistics and artist requirements are met. Duties range from transport and accommodation, liaising with event reps, stage and production managers, media and promotional bookings. Ensuring all live performance and technical advancements run efficiently, including artist and band conveniences.

### SOAP

2024 - PRESENT

#### Tour Management

I have provided tour management and backline tech support for SOAP on their support tour with Busted, covering multiple festivals throughout the UK. A key aspect of my service was to provide transport for each festival, as well as liaising with stage and production management, including LD and visuals, while providing live guitar and playback support. This year, I will be providing my services for SOAPs upcoming arena support tour as part of the Busted vs McFly production.
